Engineering

Course

Introduction

Artificial Intelligence (AI) is reshaping every industry — from healthcare and finance to education and entertainment. As businesses race to integrate AI into their operations, the demand for skilled AI engineers has never been higher. Our AI Engineering Course equips you with the skills to design, build, and deploy real-world AI applications. Over six months, you'll learn directly from experienced engineers, gain hands-on project experience, and graduate ready to work in AI roles or launch your own AI-powered startup.

Who is this course for?

- Students and graduates seeking careers in AI engineering.
- Software developers and IT professionals looking to transition into AI roles.
- Entrepreneurs aiming to build AI-driven products or services.
- Anyone passionate about technology, problem-solving, and innovation.
- Professionals from non-tech backgrounds who want to leverage AI in their industry.

Why Learn AI Engineering?

High Demand

AI engineers are among the most sought-after professionals worldwide.

Future-Proof Career

AI is driving the next wave of technological advancement.

Lucrative Opportunities

AI skills open doors to high-paying global roles.

Real Impact

Build solutions that solve real-world problems.

Why be taught by us?

Taught by Engineers who actively build and deploy AI applications.

Post-course mentorship to guide your career or startup journey.

Hybrid learning model for flexibility and accessibility.

Focus on **real-world projects** — not just theory.

Course Requirements

Basic computer literacy and problem-solving skills.

Access to a laptop (8GB RAM minimum recommended).

Reliable internet connection for online sessions.

No prior coding experience required — beginners are welcome.

Course Outline (Beginner → Intermediate → Advanced)

DURATION: 6 Months

1 Beginner (Sep 15 – Nov 14)

- Introduction to AI & Prompt Engineering
- Python for AI
- Fundamentals of Databases

2 Intermediate (2026 Jan – Feb)

- React JS for AI Frontends
- Machine Learning Essentials
- AI Databases & Backend Development
- Building your Portfolio

3 Advanced (2026 Mar – Apr)

- Deep Learning Techniques
- LLM Integration, Fine-Tuning & Deployment
- Entrepreneurship, Communication & Soft Skills

Expected Outcomes

- Build and deploy AI-powered applications.
- Fine-tune and integrate Large Language Models (LLMs).
- Develop full-stack AI systems with backend and frontend components.
- Understand AI databases and scalable architectures.
- Confidently present and pitch AI solutions.
- Be job-ready for AI roles or equipped to launch your own AI startup.

Subscription Plans

**MONTHLY
INSTALLMENTS**

KES 7,500

**TWO MONTHS
INSTALLMENTS**

KES 14,000

**ONE-TIME
PAYMENT**

KES 40,000

I'm excited to share that I have successfully completed the Artificial Intelligence (AI) Essential Course at Martial School of IT, powered by Jenga eLearning.

This programme deepened my knowledge in:

AI Fundamentals & Ethics

Risks & Governance in AI

Data & AI for Business

No-Code AI Tools

AI-Powered Productivity & Automation Strategies

Looking forward to applying these skills to drive innovation and deliver impactful solutions in the tech space.

🚀 Just completed my Cybersecurity Essentials certification at [Martial School of IT](#) – powered by Jenga AI!

This journey has been both challenging and enlightening. I've gained foundational skills in cybersecurity that have strengthened my passion for tech and digital security.

Special thanks to [Erick Otieno](#) and [Eric Kiplangat](#) for their incredible support, mentorship, and encouragement throughout the course. Your guidance made a big difference. 🙌

Excited for what's next in my cybersecurity journey! 📚 🛡️
